

Distal Humerus Fracture Board

Designed for the pinning of pediatric supra-condylar and adult distal humerus fractures

Allows the surgeon to pin these fractures without having to manually hold the fracture reduced, allowing the surgeon to focus on accurate pin placement and reduction. The height of the crossbar is fully adjustable to accommodate different size patients. Reduction is achieved by an assistant gently applying axial traction through the forearm, with the crossbar applying the counter traction. Pinning is done with the C-arm in the lateral position. An optional separate attachment to support the arm for distal humerus fractures in adults is available. Unit not sterilizable.

Designed by Burk Young, MD

PRODUCT NO'S:

2445 [Fracture Board – Pediatric]
 Main Board Dimensions: 22" x 12"
 Crossbar Height Adjusts From: 4.5" to 7.5"

2445-01 [Fracture Board – With Adult Adapter]

Optional/Replacement Part:

2445-06 [Adult Adapter]

Optional Adult Adapter
