

# Nicholson Small Bone and Shoulder Cement Removal Gouges

Designed to facilitate cement removal in smaller diameter bone of the humerus, ulna, and smaller implant geometries

Designed by Gregory Nicholson, MD

- ▶ Reverse bevel tip helps the gouge to slide between the bone and cement.
- ▶ T-shaped Gouge-Splitter allows the gouge to slide between the cement and bone and vertically split the cement mantle to facilitate removal.
- ▶ Small diameter widths and curvatures more closely match shoulder and elbow implants and smaller bone diameters.
- ▶ Shorter length allows for better control and access.
