

Whelan Flexible Chisel Guide

Designed by E. J. Whelan, III, MD

Designed to help stabilize a thin chisel blade until it's within the bone prosthesis interface

Guide with sliding handle helps to stabilize a thin flexible chisel blade until it's within the bone prosthesis interface. Chisel tip lets it hug prosthesis to help prevent perforation. Slap hammer threads into the handle and is designed to facilitate blade removal. Easily changeable disposable blades help assure sharpness.

Chisel blade features an ultra hard titanium nitride coating to help extend life by increasing surface hardness, prolonging sharpness, and resisting chemicals and corrosion.

PRODUCT NO'S:	
5301-00	[Complete Set]
Individual Instruments:	
5301-01	[Guide Only]
Overall Length: 5.5" to 8.5" (14cm to 21,6cm) w/o blade	
5301-02	[10mm Chisel Blade Only]
Overall Length: 4.625" (11,7cm)	
Blade Thickness: .020" (.51mm)	
3040	[Slap Hammer]
1015	[Sterilization Case]
