Goytia Stackable Hohmann Retractors

Designed by Robin N. Goytia, MD
Deep version modification designed by Brandon Thompson, CST/CFA

Interlocking design helps to increase depth and leverage in hip exposure, particularly of the anterior acetabulum—especially useful with large patients

- ▶ Custom fitted holes for interlocking retractors helps provide stability
- ▶ When “stacked”, the increased lever arm of the retractor helps reduce fatigue
- ▶ Ideal for use with large patients where extra depth, leverage and force is needed
